

Print this self-quotation document and calculate the cost of developing your web site using the information below.

If you are starting from scratch without any images, panels, buttons etc, they will need to be calculated into the costs.

If you have photographs to include into your site, they need to be of good quality and in digital JPEG (jpg) format.

We can scan photographs for you as long as you own them, or they are free from copyright.

Initial Consultation – We allow 2 hours for an initial design and concept meeting **Free of Charge**

After the concept has been decided, we will design a basic layout page and load it to our development server for you to peruse and make comments. This will be **Free of Charge** and “online” for 48 hours.

(a) Number of information pages required. _____ (Minimum suggested number is 8 pages)

Opening page____ home____ about____ site map____ services____ contact____ gallery____ links____

Other pages required _____

(b) Number of photographic pages required. _____

Cost per year \$88.00

All the packages include

Web mail access to email, ftp server access, phone support, web page statistics if required, email spam filtering.

DO IT YOURSELF WEB SITE DESIGN - Cost for the Do it Yourself web site package is \$330

This service is available to enable you to design, construct and manage your own web site.

The service includes 6 hours of “one on one” tuition with one of our web designers.

During the tuition sessions you will be designing and constructing your very own web site template using the design expertise of your tutor. You will also learn how to link your pages together, create hypertext, hyperlinks and upload your site to your server using an FTP program.

Your fees will include the following...

1. Full ownership of the template that you made at the tuition sessions. 2. Two CDs

(a) CD#1 contains a full tutorial in easy “step by step” stages.

(b) CD#2 contains the ***software needed to author and upload your web site.

*** Please note that this software is a 30 day trial version and you will need to pay for the full version by downloading it from the Internet at a cost of \$69US. The File Transfer Protocol program is available free of charge.

Self Calculation

To help you calculate the cost of us constructing a new web site, we have included an example costing estimate.

(This costing will be calculated on "**Example #3 - Enhanced beveled panels**" shown in our web site)

Let us assume that you require ...

8 information pages

10 photographic pages

Set of textured 3-dimensional buttons

Textured top banner with logo

<u>INFORMATION PAGE TEMPLATE DESIGN</u> – (Standard charge)	<u>\$100</u>
<u>Additional information pages</u> - 8 information pages @ \$15 per page	<u>\$120</u>
<u>PHOTOGRAPH PAGE TEMPLATE DESIGN</u> – (Standard charge)	<u>\$100</u>
<u>Additional photographic pages</u> - 10 photographic pages @\$15 per page	<u>\$150</u>
<u>Top Banner</u> – Simple logo and title name	<u>\$40</u>
<u>Buttons</u> - Set of textured 3-dimensional buttons	<u>\$30</u>
<u>Uploading costs</u> - (This site will be about 2MB)	<u>\$30</u>
<u>Search Engine Submitting</u> (Google and Yahoo)	<u>Free of Charge</u>
<u>Meta Name inclusion</u> - (Maximum 30 meta names)	<u>Free of Charge</u>
<u>Public Document HTML codes</u> - (Added to all pages)	<u>Free of Charge</u>
<u>Initial Consultation</u> - (2 hours maximum)	<u>Free of Charge</u>
<i>Total charge for the finished web site uploaded and operational</i>	<u>\$570</u>

In addition you may require a Domain Name and a Web Hosting Service.

Please note that some Internet Service Providers allow their clients approximately 10MB of web space free of charge.

Please contact your ISP to see if this applies to your contract with them.

If this is the case, you may not require a Domain Name and your web site address will look something like this ...

www.internetserviceprovidername/~username/

Please feel free to contact us by email: abc123etc@bigpond.com if you require any further information.
